

Project name: **MIN-NOVATION Mining and Mineral Processing Waste Management Innovation Network**

Baltic Guidelines

December 2012

The Baltic Guidelines represent the key actionable topics that the partners have decided to address on the regional and transregional (MBN) level.

Topic 1: Recommendations for improving the interpretation and implementation of mining waste-related legislation
Topic 2: Analysis of support mechanisms and promotion of effective approaches to supporting SMEs active in the extractive industry
Topic 3: Transnational technology transfer guidelines
Topic 4: Sharing of good practice in waste inventory databases for secondary mineral resources
Topic 5: Promotion of technology pilot projects which demonstrate the re-usability potential of mining waste
